

AZTIBASE NETWORK

The AI-Native Blockchain — Where mining does useful AI work

WHAT WE BUILD

Layer-1 blockchain where validators earn rewards by running **AI inference** instead of solving meaningless puzzles. **Proof of Useful Work (PoUW)** turns every block into productive computation. AI inference is a native transaction type, verified on-chain through deterministic re-execution and quorum attestation.

Dual VM (WASM + EVM) — write contracts in Rust, C, or Solidity. **DAG consensus** with 10,000+ TPS and sub-second finality. **Server-independent** via WebRTC browser nodes.

TRACTION & PROOF

- **44,900** lines of production Rust across 9 crates
- **940+** passing tests, 0 clippy warnings
- **18.3K TPS/core** benchmarked (Criterion)
- **Live testnet**: 3 nodes, 400ms blocks, sub-second finality
- **59 sprints**, 103 commits, full build traceability
- **Pre-mainnet audit**: 71 findings, 70%+ resolved
- **48 RPC methods** — all functional, documented
- **One-click** validator deployment (setup-validator.sh)

TOKENOMICS

- **AZTB** | Hard cap: 1 billion | Halving: every 2 years
- **Year 1**: 120M emission — 70% validators, 15% PoUW, 10% treasury, 5% insurance
- **EIP-1559** fee burning creates deflationary pressure

MARKET OPPORTUNITY

- **\$150B+** AI infrastructure market by 2027
- **\$7B+** combined FDV of decentralized AI compute projects

Bittensor (\$3B+), **Render** (\$3B+), **Akash** (\$1B+) — all bolt compute onto existing chains. None have AI integrated INTO consensus.

Aztibase is the first blockchain with AI at the consensus level

REVENUE MODEL

- **Validator hardware** — Standard (\$699) and AI Compute (\$1,500) nodes
- **Validator NFTs** — limited-supply mainnet slots (\$200–\$1,000)
- **Token sale** — Fjord Foundry LBP (fair price discovery)
- **Protocol fees** — 5% cut on all PoUW inference tasks
- **Year 1 projection**: \$250K–\$850K (conservative)

THE ASK

[TO BE CONFIRMED]

Pre-seed / Seed — SAFE or Token Warrant

USE OF FUNDS

Engineering 40% | Legal 25% | Infrastructure 20% | Marketing 15%
